

Hands-Free Operations

All LIVALL functions are designed to be used hands-free to ensure user safety remains the number one priority.

Smart Lighting

Smart lighting integrates brake sensor to trigger warning lights and adaptive technology to ensure your visibility in dark condition. Operate LED turn signals via handlebar remote control.

Fall Detection

In the event of an accident, the emergency system will kick in automatically and send your GPS location to your emergency contact(s).

Press For SOS

If in distress, press the red button for 5 seconds and your emergency contact(s) will receive an alert message with your GPS location.

One-Click Answer

Answer phone calls using the remote control and enjoy clear sound both ways with the built-in Bluetooth speakers and wind-proof microphone.

PTT Walkie-Talkie

Easily communicate with your fellow cyclists using the Walkie-Talkie function when in group riding.

Voice Navigation

Listen to GPS voice navigation via the built-in speakers with your connected smartphone.

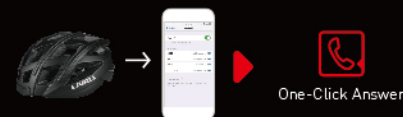

HOW DOES IT WORK

1 Connect the Bling Remote

The connection will automatically be established when you turn on the helmet and Bling Remote, you can control the turn signal lights on the helmet via the Bling Remote.

2 Connect the Smartphone

If you want to play music and take calls in and out, you need to connect the smart helmet with a smartphone over Bluetooth 4.0.

3 Connect the LIVALL Riding App

If you want to activate functions like Walkie-Talkie, photo button, and SOS alert, you need to connect the helmet with LIVALL RIDING APP.

The Best APP For Group Riding

APPLE IOS13 update
Background recording is no longer permissible. Apple's iOS 13 no longer allows apps to record data in the background - applications designed to record, need to be open and active for the recording feature to work.
The Walkie-Talkie feature on the LIVALL Riding App, therefore, needs to be open and active to function optimally.

170⁺ Patents | **30⁺** Awards | **10⁺** Certificates

About Us

As the world's first smart and safe cycling helmet brand, LIVALL has been dedicated to smart sports equipment and specialized in the development of smart helmets, riding community App, Nano cadence sensor, smart bicycle, and smart accessories.

With our main focus on product innovation and manufacturing experience, we have received recognition from the industry and our end users by granting 30+ awards and medals at home and abroad.

We currently own 170+ domestic and international patents and have obtained 10+ international certifications, including CPSC1203, EN1078, CE, FCC, NCC, ROHS, BQB. With its products exported to more than 60 countries overseas. LIVALL has set up its office/subsidiary in Auckland (NZ) and San Francisco (USA).
