

F300

The REKKORD F300 is our advanced fully automatic record player which brings you the possibility to adjust your tonearm. The entire automatic system as well as the tonearm and the damped aluminum platter are built on a floating sub-chassis platform which is decoupled from the rest of the chassis. Easily setup the tracking force & anti skating, connect it to your amplifier and you are ready to enjoy your records. As it is a fully automatic machine, it offers you a lot of comfort. It is adjusted and fine-tuned by experienced technicians and is based on a highly complex mechanism which has traditionally matured and further developed over decades. The preadjusted high quality AT91 cartridge is mounted on a carbon fiber reinforced headshell which brings you a superb sound experience. Cables, dust cover and a single adapter comes supplied with the turntable.

Features

- Pre-adjusted AT91

Alrounder MM cartridge. Pre fitted and adjusted in our factory. Mounted on a carbon fiber reinforced headshell.

- Fully automatic

The automatic system is completely disengaged while the record is playing. Comfort with unrestricted sound quality.

- 8,3" weight-balanced tonearm

Ultra low mass (ULM) aluminium tonearm with steel tip-ball bearings from our own production. Adjustable tracking and anti-skating force.

- Heavy aluminum platter

Solid stamped balanced aluminium platter.

- Sub chassis

The automatic system, the tonearm and the platter are decoupled from the rest of the chassis by the sub-chassis system.

- One piece MDF chassis

The main chassis is made out of a single piece of MDF which has an ideal resonance-dampening basic character.
