

DREAME

Aero Straight

Air-driven straightening with heat-reduced care

Dreame Aero Straight

Air-driven straightening with heat-reduced care

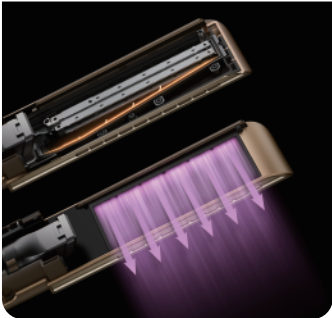

Aero Straight employs advanced high-speed airflow technology to efficiently dry and straighten hair without the need for preheating. Featuring three versatile modes—root drying, wet hair straightening, and dry styling—alongside triple hair care elements and a safety guardian system, it delivers smooth, protected, and sleek results instantly, ensuring a faster, safer, and effortless styling experience.

Key Features

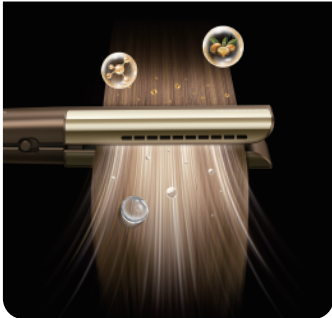

Airflow-Driven Drying and Straightening

Aero Straight uses high-speed airflow to reduce reliance on heating plates, reducing heat exposure. Root Mode (57°C) dries and protects hair and scalp. The wet-to-dry function smoothly dries and straightens damp hair in one step, while on dry hair it enables versatile styling, including high-volume roots and C-curls.

Efficient Airflow System for Enhanced Straightening

The optimized vent system, featuring 6 vents and a 5-zone airflow chamber, delivers consistent airflow and even heat distribution across the hair. Engineered channels precisely guide the airflow, improving straightening efficiency with every pass.

Straightening with Hair Caring

Negative ions work to reduce static and smooth the hair cuticle for a sleek finish. The keratin-infused coating reinforces hair structure, enhancing its resilience to styling stress, while the argan oil layer delivers moisture and nourishment, promoting softness, shine, and overall hair health.

Smart, Safe & Energy-Efficient

The Auto Slowdown adjusts airflow when the handle is opened, while Auto Pause puts Aero Straight into standby after 3 seconds of inactivity. For complete safety, Auto Off powers down the unit after 3 minutes of idle time.

Specifications

Rated Voltage	220-240V
Rated Power	1600W
Rated Frequency	50-60Hz
Unit Dimensions	44 × 53 × 331mm
Wire Length	2.8m
Net Weight	507g
High Speed Motor	110,000RPM
Noise Level	76dB
NTC Thermistor Checked	200 times per second

Features

Airflow Straightening with Less Heat

Dry and Straighten in One

Triple Hair Care Protectants

110,000RPM Powerful Motor

Root Care Mode

Intelligent Safety System

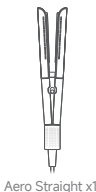

Smart Display Showing Multiple Modes

NTC Temperature Control
